Zimmi Yellow Diamonds
Collection 2025

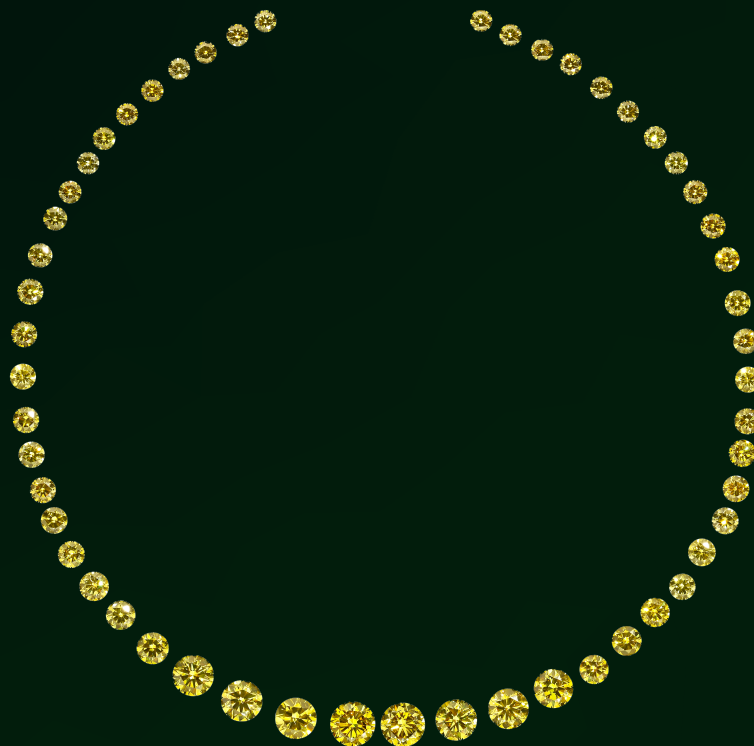

The Unique Story of Zimmi Yellow Diamonds

Zimmi vivid yellow diamonds from Sierra Leone are among the rarest and most desirable gemstones in the world. Their vibrant yellow color is attributed to single nitrogen atoms in their structure, a feature that sets them apart. Unlike most diamonds, where nitrogen aggregates over time and diminishes the color, Zimmi diamonds have retained their unique structure for hundreds of millions of years.

Recent studies show that these diamonds formed 650 million years ago and were transported to cooler depths shortly after, preserving their color for nearly half a billion years before volcanic activity brought them to the surface. This extraordinary geological journey makes Zimmi diamonds not only stunning but scientifically remarkable, driving their exceptional value in the market.

At A. Gul KG, we take pride in offering exceptional natural diamonds, including rare and unique gems like Zimmi vivid yellow diamonds.

Fancy Vivid Yellow Zimmi Diamond Layout

37.12 Carats, SI1-IF (VS), GIA Certified, No Fluorescence

Detailed Overview

This remarkable 37.12-carat Fancy Vivid Yellow Zimmi Diamond Layout embodies the unmatched brilliance and intensity of Zimmi diamonds. Each diamond is carefully selected for its vivid yellow hue, clarity ranging from SI1 to IF (VS), and seamless visual harmony.

GIA-certified with no fluorescence, this layout offers exceptional quality and authenticity, making it a rare and stunning choice for crafting a high-jewelry masterpiece.

Price: €1,800,000

Fancy Vivid Orange Yellow Zimmi Diamond

5 Carats+, SI1 Clarity, No Fluorescence

Detailed Overview

Sourced from the renowned Zimmi region in Sierra Leone, this GIA-certified diamond exemplifies exceptional beauty with its vivid yellow hue, created by nitrogen atoms and structural deformations in its crystal lattice. Graded Fancy Vivid, the pinnacle of color saturation, it belongs to the elite 23% of orange yellow diamonds with this remarkable intensity.

Featuring a modified oval cut with 59 facets, this gem is meticulously crafted to optimize light reflection and brilliance. With only 12% of orange yellow diamonds cut as ovals, its rarity is undeniable. Weighing over 5 carats, it is part of an exclusive category representing just 1.4% of orange yellow diamonds.

Price: €750,000

Fancy Intense Yellow Zimmi Diamond Layout

40.82 Carats, SI1-IF, GIA Certified, No Fluorescence

Detailed Overview

This extraordinary 40.82-carat layout hails from the renowned Zimmi region in Sierra Leone, famous for producing the world's most vibrant yellow diamonds.

Comprising 53 GIA-certified diamonds in various cuts, each graded Fancy Intense Yellow, this layout showcases a rich, saturated hue that captivates with its brilliance. With clarity ranging from SI1 to IF, it achieves a perfect balance of visual allure and natural rarity.

A masterpiece of precision and artistry, this layout offers limitless potential for crafting high-jewelry creations that leave a lasting impression.

Price: €525,000
